REMARKS

The figures of births and deaths shown in this statement for week ending the 12th February 1955, relate to 200 towns with an estimated population of 26,921 thousands. The total number of towns is 300 and their population is 38,987 thousands. Thus 67% of the total number of towns representing 69% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 14,526 and 6,519 representing birth and death rates of 28·1 and 12·6 per thousand of population respectively.

(a) States (Part A and Part C).—The data here relate to 172 towns with an estimated population of 23,304 thousands. Information about Ajmer, Assam, Bihar, Bhopal, and West Bengal could not be included. The total number of towns is 252 and their population is 32,571 thousands. Thus 68% of the total number of towns representing 72% of the total population is covered. The number of births

and deaths recorded in these towns were 13,088 and 5,814 representing birth rates and death rates of 29·1 and 12·9 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(B) States (Part B).—The data here relate to 28 towns with an estimated population of 3,527 thousands. The total number of towns is 48 and their population is 6,416 thousands. Thus 58% of the total number of towns representing 55% of the total population is covered. The number of births and deaths recorded in these towns were 1,438 and 705 representing birth and death rates of 21·2 and 10·4 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
